

Define your problem statement

Designing a Machine Learning model which aids the students in shortlisting Universities with their profiles. This model gives them a fair idea about their admission chances in a particular university.

① 5 minutes

Involves the pressure of visiting the counselling centres and other universities

Involvement of third parties(Counseling centres).

Involves payment and is time consuming

Accurate and calculative results are not guaranteed.

Brainstorm

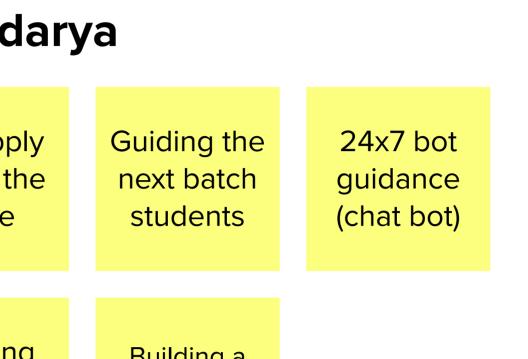

Write down any ideas that come to mind that address your problem statement.

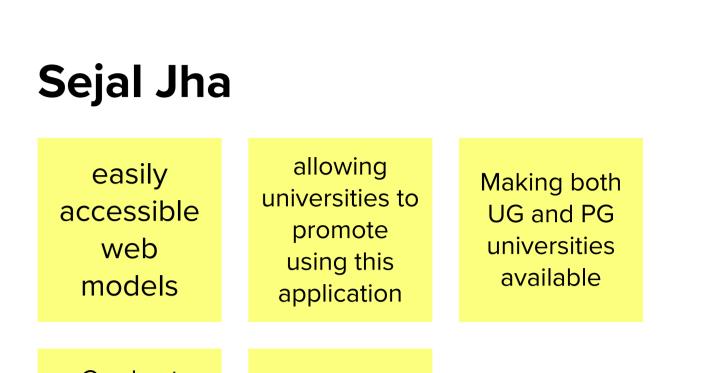

① 10 minutes

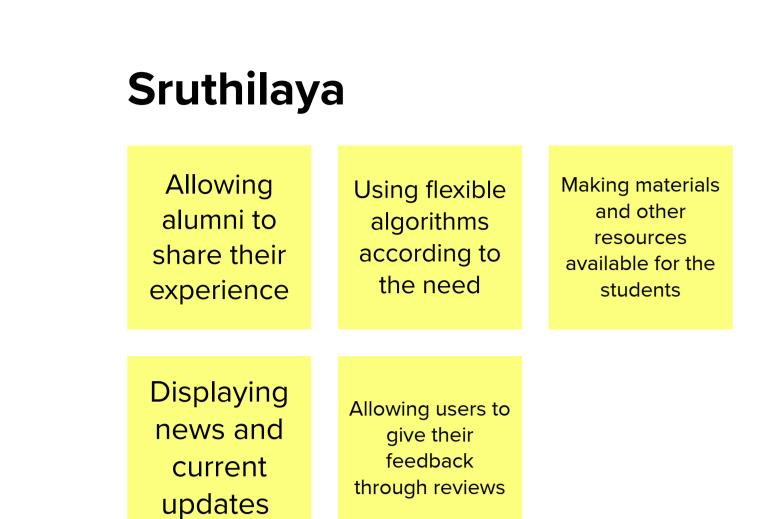

Sarveswaran

Machine learning and deep learning Allowing

Sounda Can apply across the globe

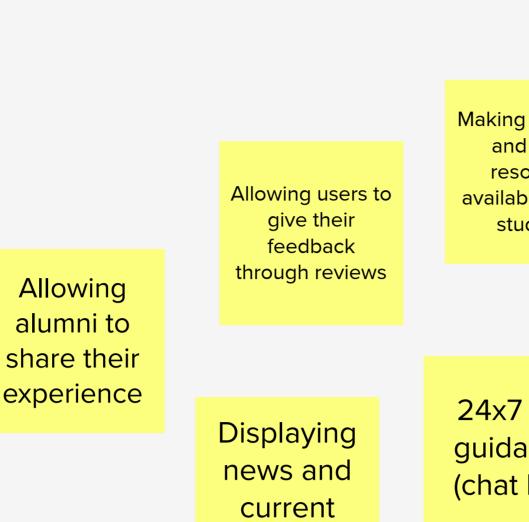

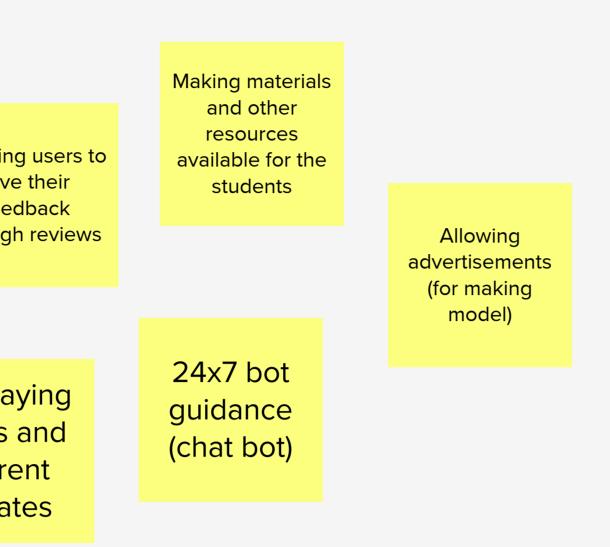

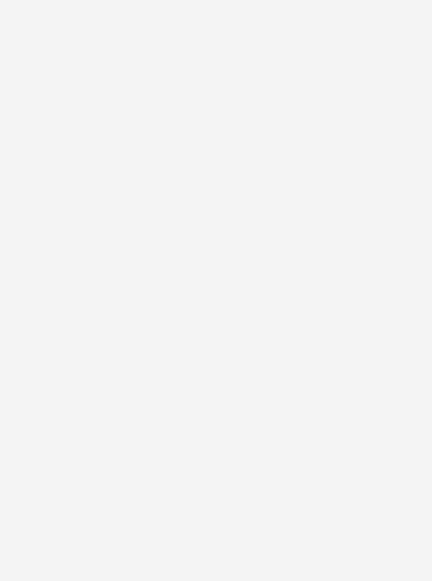

Group ideas

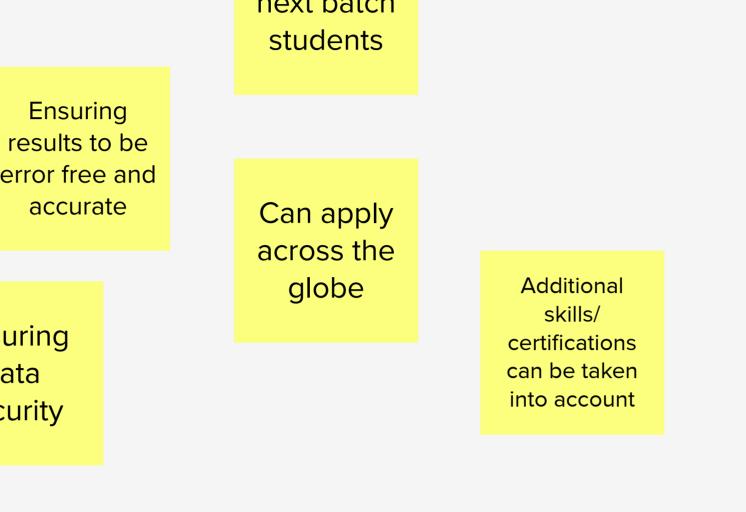

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

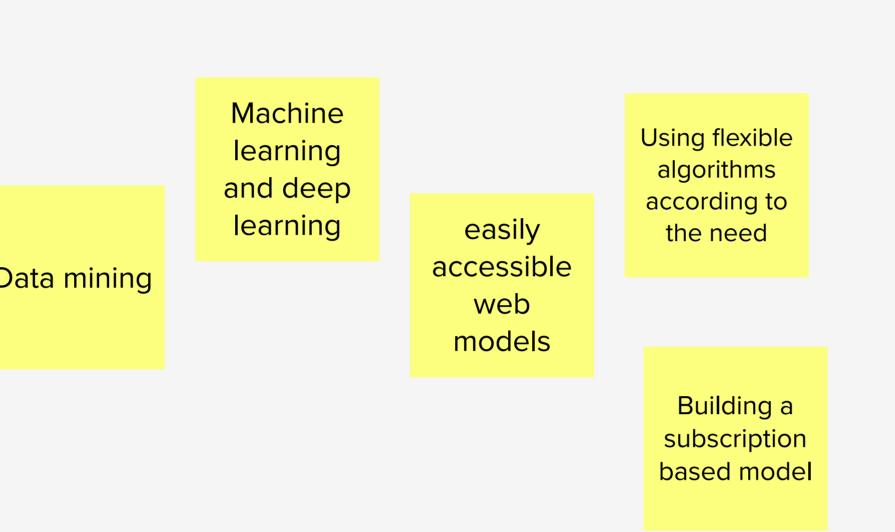

① 20 minutes

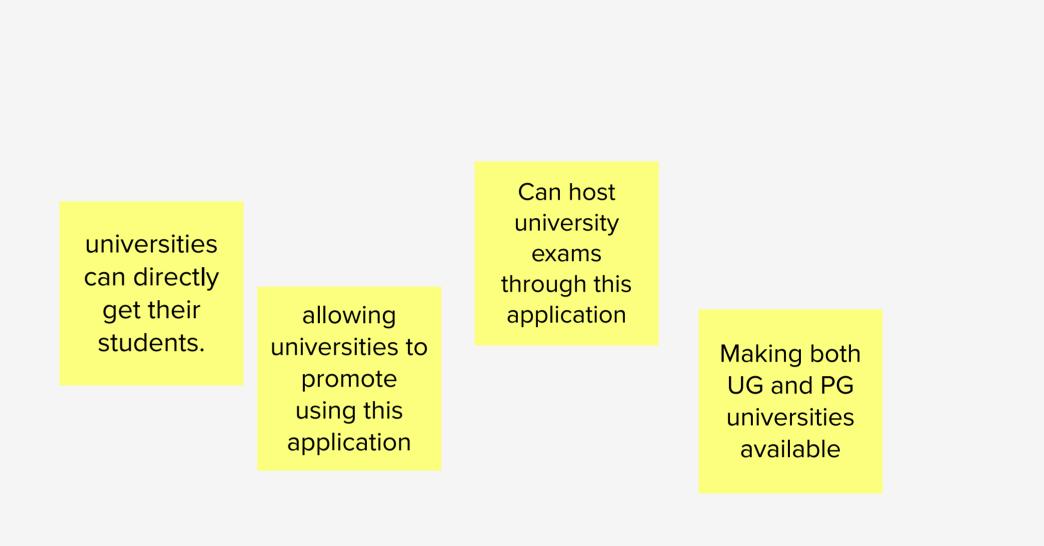

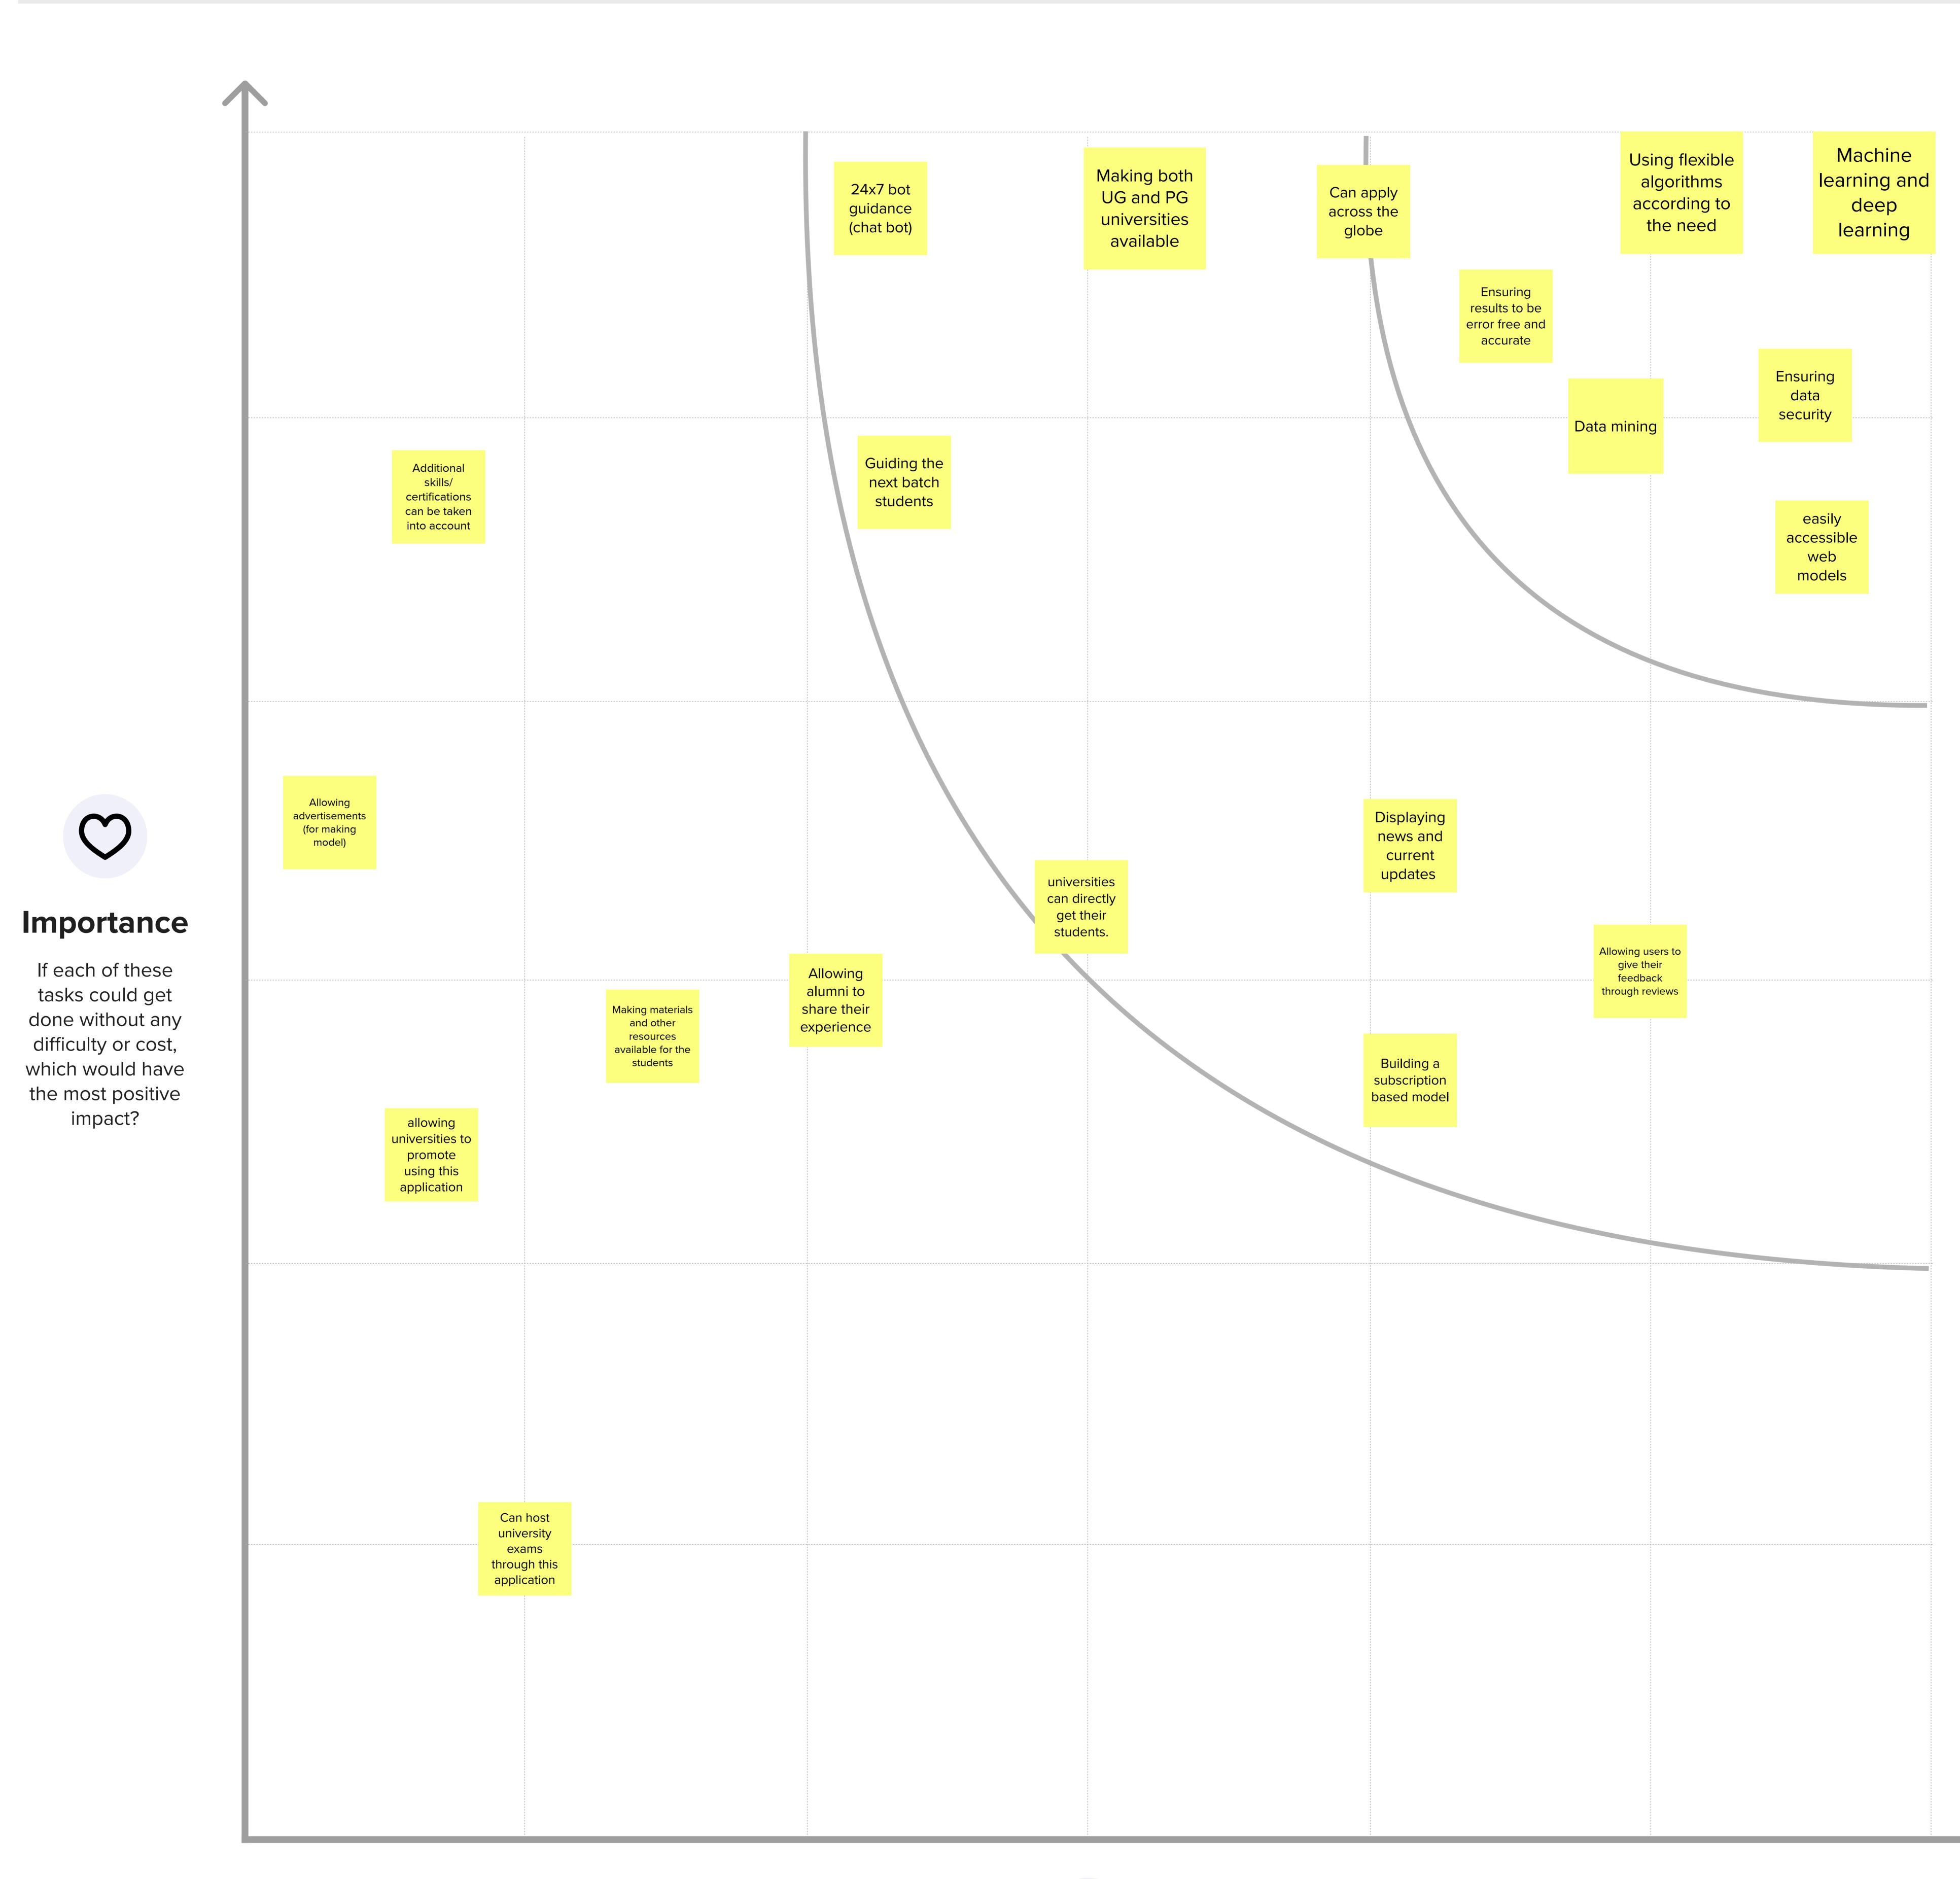

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

① 20 minutes

Feasibility

Regardless of their importance, which tasks are more feasible than others? (Cost. time, effort, complexity, etc.)
